

HARDNESS TESTING ACCESSORIES

A quality innovation from EURO PRODUCTS

Euro Products is a privately owned British company, specialising in the manufacture of accessories for all types of hardness testing equipment.

We have set up a manufacturing facility and a purpose built UKAS calibration laboratory designed especially for the measurement of Diamond Indenters and Test blocks.

As an independent company, we firmly believe we now offer the most comprehensive range of accessories and UKAS calibrations for hardness testing currently available from a single source in Europe, covering test blocks and diamond & ball Indenters.

We are pleased to offer you our new generation of accessories and the benefits available to you when purchasing from us on a regular basis.

OUR STANDARD RANGE COVERS:

Diamond and Ball Indenters for all types of m/c's

- Vickers
- Rockwell method
- Micro Vickers
- Knoop
- Specials of all types
- Brinell Ball Indenters

Test Blocks for all scales

- Vickers
- Rockwell method 30 scales
- Micro Vickers
- Knoop
- Brinell

WE SET THE STANDARD

It takes a tremendous amount of skills to build a reputation as an innovator in today's highly technological world, yet that is exactly what EURO PRODUCTS has accomplished since its inception, using its 60 years of experience in the hardness testing field. Our commitment to research and development and dedication to quality, precision and accuracy now enables us to offer a new generation of Diamond Indenters and test blocks, which will help you to maintain and reproduce the high levels of accuracy required to meet National and International standards in hardness testing.

TOP PERFORMANCE AND QUALITY FROM A STANDARD PRODUCT RANGE THAT FEATURES:

DIAMOND INDENTERS

Stainless Steel Holder - No rusting or Tarnishing.

Specially Formulated Tungsten Based Matrix

This eliminates any possible movement of the diamond under test, a problem that has been experienced by many indenter manufacturers, which has resulted in geometrically incorrect indenters being used, resulting in inconsistent readings.

All Diamonds are sorted for Size, Shape and Quality

To increase indenter life the crystallographic axis of the diamond is orientated to maximise the strength of the diamond cone.

All Diamond Indenters are Geometrically Measured

This confirms that they meet the requirements of the relevant standards.

All Indenters are Performance Tested

This identifies any seating irregularities and confirms that the hardness levels obtained are correct as indicated by our standardising machines, which are traceable to the National Standard.

Every Diamond Indenter is manufactured to National and International Standards

To maintain the high levels of accuracy required in performing a hardness test, the indenter must have known geometrical and performance parameters, there is no substitute.

Euro Products commitment to customers using our accessory range.

We offer guaranteed delivery dates

On receipt of an order we will confirm a delivery time in line with current production output.

Competitive prices

Attractive discount structure for repeat and quantity business

No quibble guarantee

Full time Customer Service Representative whose job is to advise on your requirements and solve customer problems

If you have a requirement call us, we will be only too pleased to discuss your needs and advise you of the financial benefits of becoming a regular customer.

TEST BLOCKS

Varied Range to cover majority of Hardness Scales.

Custom made test blocks

We will manufacture Test Blocks from material you supply, to meet any individual product checks you may have.

Continued research into new materials to improve specifications.

0441

UKAS CERTIFICATION

UKAS Calibration Laboratory

Euro Products is an accredited UKAS calibration laboratory and has numerous accreditations for the measurement and certification of all types of Diamond Indenters and the majority of test blocks used on hardness testing machines. The typical range covers: *Rockwell Method, Vickers, Micro-Vickers, Knoop, Specials of all types.* Additional accreditations are being added as an on going process.

UKAS Certification where ever possible

We will carry out certification of your original diamond indenters and test blocks to confirm they meet all requirements and issue a UKAS Certificate as confirmation of their accuracy.

(Traceable Certification not just a certificate)
